1. Clean Technology :

- We use Bagasse and FSC paper in manufacturing to reduce the forest depletion.
- We test the plastics and other relevant materials for compliance of REACH, SVHC and use only safe materials.

2. Power Consumption :

- Production is run on solar power as much as possible. At present we are producing approximately 5,25,000 KWH per year in-house with the help of solar panels.

- We have installed sky pipes, an unique solution to use focused day light inside the buildings. By using this, we have increased the lux levels from 150 to 300. Power saved is calculated at 5.04 kwh/hour with the amount saving of Rs.23 per hour.
- Natural light is used majorly during day time by using polycarbonate sheets in the roof and side walls to allow daylight inside the warehouse.
- By replacing the air compressors we use for cleaning by air guns and other alternative methods for cleaning, we have saved around 127KW/ day of power usage amounting to around R.5,00,000 per year.
- Lights used in the plants are 28 Watts tube lights of T5 variety which ensures more lighting with less power consumption.
- All the computers are with the settings to go into sleep mode if inactive for three minutes. This ensures minimum power consumption when computers are not in use.
- The inside temperature of the plants are kept low by 4-5 degrees Celsius by insulating the building by smart board.
- Roof is insulated by fibre glass insulation with aluminum foil to keep temperatures low by reflecting sunlight.
- Instead of providing additional lights to increase lux levels in production, it has rearranged the lights to provide almost 50% more lux with same number of lights.
- The Company maintains all its electrical equipment in proper condition. Systems are set so that minimum power is consumed.

3. Transport : In continuation with Company's sustainability initiatives, it has started ocean transport of our raw material in place of road transport, thereby saving on fuel, time and money.

While making agreements with transporters, the Company insists that vehicles with PUC and proper maintenance only need to be used for its purposes. Without PUC, no vehicle is allowed within Company's premises nor used for loading and unloading purposes.

4. Environment Initiatives :

- The Company is maintaining more than ten thousands trees and plants in its factories to increase the green cover. The Company has started the concept of garden green in our factories, where in it covers as much open place as possible with greenery including lawns. The Company add around 300-400 trees every year in its factories.
- Rain water harvesting is done by way of self constructed pond and wells in Company's plants.

- Solar heater used for heating water and cooking in canteen operations.
 - Additional 100 KW of power is generated by installing solar panels. As of now total 1600 KWH of solar power is generated per day which amounts to approx. 5, 25,000 KWH in a year.
 - By generating power by solar panels, we are also reducing CO2 emissions by around 450 tons per year which is required to generate equal amounts of power in India.
